Travel Agency Website using HTML, CSS and JavaScript

Abstract:

This Project is made for helping users to reach their favorite destination without wasting time in searching, booking and exploring. It is user friendly and easily handled by the user.

Introduction:

This project which is named "Holiday Time" is a Travel Agency Website developed on HTML, CSS, JavaScript. The main objective of developing this project was to create a responsive website for the Travel which contains Exploring places, tickets bookings, Hotel booking and many more. Through this website users can get the complete details of the tour and travel, package, booking, such as hospitals, contact details, address, images, etc. This project is in HTML and CSS so it's a static website and does not perform any type of dynamic database operations. I develop this sample html projects with source code who want to use html projects to learn.

Pages in the project:

- Home: This contains the basic information about the "Holiday Time" Travel Agency.
- Services: This contains the services which they provide us for reaching and staying in destination.
- Top Destination: This contains all the famous holiday destinations in this Travel Agency website.
- Trending: It contains all the tour, hotel, activity, car, flight, yatch trending facility available.
- About: This contains all about the website system information and their working.
- Contact Us: It contains all the contact details and query related sections.

Technology Used:

- HTML
- CSS
- JavaScript

Supported Operating System:

- Windows
- Linux
- Mac
